MX3+ BT

DESCRIPTION

wavemaster MX3+ BT is a versatile 2.1 stereo speaker system that lets you stream music from a Bluetooth®-enabled smartphone, laptop or tablet with superb clarity. It provides a clear and powerful audio reproduction, combined with a compact and classic design at a very affordable price.

MX3+ BT contains two compact satellite speakers alongside a wooden subwoofer (with bass and treble control) and a separate control unit with headphone connector and an additional line-in for mobile audio sources. Setting up MX3+ BT is quick and easy. Alongside its Bluetooth® wireless capability it is supplied with long cables to give you flexibility when arranging the individual components within your environment. To gain maximum performance from your studio headphones, MX3+ BT features an integrated headphone amplifier. Moreover it is equipped with a dedicated line-in for mobile audio sources. This has been specially designed for the low-level outputs that are typical with mobile devices. Situated on the main control unit itself, it is easy to plug in and control your mobile device.

wavemaster MX3+ BT is powered by an integrated 3-channel amplifier with 50 Watt power output (RMS). The satellites are equipped with high quality wide-range drivers, protected by removable protection covers. A powerful long stroke bass driver (13 cm) fires the wooden subwoofer. In combination, these components create a very clear, dynamic and powerful stereo sound.

SPECIFIES

- **Sound:** Powerful, dynamic stereo sound powered by 3 separate amplifier modules (incl. bass and treble control).
- **Satellites:** Compact design combined with high quality wide-range drivers. Detachable front covers and wall mountable cabinet.
- **Subwoofer:** High performance long stroke bass driver in wooden cabinet with bass reflex technology.
- **Bluetooth®:** The integrated Bluetooth® module offers high quality audio streaming. It operates on the A2DP standard and is compatible with all devices using Bluetooth® 2.1 (and upwards).
- **Control:** Integrated within the remote control unit are ON/OFF (standby), volume control, Bluetooth®-/line switch, line-in (optimized for mobile sound sources) and headphone-out (amplified).
- **2 x Line-In:** Connect an additional mobile stereo source (e.g. smartphone) to the dedicated socket on the control unit, without disconnecting your main source.

- **HEADPHONE JACK:** MX3+ BT offers an integrated headphone amplifier. Simply connect your headphones directly to the control unit and the speakers will mute automatically.
- **ECO-STANDBY:** MX3+ BT consumes less than 0.5 Watt during standby. Moreover there is a mains power switch located on the subwoofer.

TECH DATA

- Speaker drivers: subwoofer 13 cm bass driver, satellites 7 cm wide range drivers
- Amplifier: integrated with 3 separate channels
- Amp performance (RMS): subwoofer 30 Watt, satellites 2 x 10 Watt
- Frequency response: subwoofer 30 - 150 Hz, satellites 150 - 20.000 Hz
- Input sensitivity: subwoofer line-in 500 mV, remote line-in 250 mV
- Cable remote control: with on/standby function, volume control, Bluetooth®-/line switch, headphone jack (amplified) and line-in
- Bluetooth®: A2DP Standard for wireless audio streaming (compatible from BT 2.1)
- Satellite speakers: compact design (wall mountable), detachable front covers and 3m connection cable
- Subwoofer: wooden cabinet with bass reflex technology, bass control, treble control and main power switch
- Power supply: internal, 100-240 Volt ~ 50/60 Hz, 0.7A max., standby power <0.5 W (230V)
- Connection: 2 x 3.5 mm mini stereo plug, RCA, Bluetooth®
- Measurements (WHD): satellites = 82 x 178 x 98 mm, subwoofer = 180 x 280 x 265 mm, control unit (Ø x H) = 70 mm x 35 mm
- (Subject to change without prior notice)
