FANTEC QB-X2US3R

Backup your data with the FANTEC QB-X2US3R with space for up to two SATA I/II/III hard drives in one case. Each hard disk is used separately and can be changed, replaced or expanded independently from brand or capacity. The USB 3.0 SuperSpeed interface provides high data transfer up to 5Gbps and the "UASP" transfer protocol ensures shorter transmission times. Easy Plug & Play with hot swap. The built-in temperature sensor automatically controls the 60mm fan and ensures optimum cooling of the hard drives. The sync mode automatically switches off the device in synchronization with shutting down the computer.
