# Wired RGB Controller C10L

The Wired RGB Controller C10L is a compact size LED controller that allows users to easily customize their RGB fans and other devices without the need for an RGB capable motherboard. With six pre-set modes and seven different single colors options, you can have the colorful rig you've always wanted with quick, simple installation at an affordable price.

## Features

**Mode Switch Button** – Easily switch between six lighting modes with the touch of a button.

**Color Switch Button** – Switch between seven different colors across all connected devices instantly.

**Brightness Button** – Adjust your LED lights between five different brightness levels in a single button press with no delay time.

**No Software Required** – Quickly adjust the mode, color, and brightness of all connected RGB devices without the need for software.
