

Enjoy a private  
digital life with  
upscreen®  
Spy Shield

Privacy

#ByeByeSpies

#### Do you care about your privacy?

On business trips, in public places or in close customer contact, your sensitive and confidential company data is repeatedly exposed to strangers' eyes.

Customers, who value their privacy, protect their private data with our upscreen® privacy protection products and thus prevent exposure of sensitive information from sideways glances.

#### How does the upscreen® privacy protection technology work?

Our privacy protector products consist of microlouvers that limit the viewing range of your display. This allows a clear front view of your screen, while unwanted sideways views are blocked and shown black, starting at an angle of 30 degrees.

upscreen® Spy Shield privacy protectors are available as **privacy filter** as well as **privacy screen protectors** (self-adhesive) and are compatible for all your displays.

Product Features:

-  Privacy Protection
-  Scratch Protection
-  Easy Cleaning
-  Anti-Glare Protection (filter only)
-  Anti-Bacteria Protection (filter only)
