- 5. Installing a SATA hard disk drive
- 1. Open the case cover lock (fig. 1).

fig. 1

2. Remove the case cover from the case body (fig. 2).

3. Slide a 2.5" SATA HDD into the HDD mounting bay (fig. 3).

4. Place the case cover back onto the case body (fig. 4).

fig. 4

5. Close the lock (fig. 5).

fig. 5

- 6. Use the included USB3.0 cable to connect the device's Mini USB3.0 connector to a USB3.0 connector of your PC/laptop.
- The QuickStore Portable will automatically be recognized by the operating system and all required drivers will be installed. The device is now ready.

Note:

Brand new HDDs built into the case must be partitioned and formatted. Proceed as described below (e.g. Windows XP): Start / Settings / Control Panel / Administrative Tools / Computer Management / Disk Management. Click the respective HDD with the right mouse button and choose partition/format.

6. Installing the software

- 1. Insert the included Driver&Tools CD into your CD/DVD drive.
- 2. Choose your CD/DVD drive (e.g. D:\).
- 3. Open the folder "Sharkoon".
- 4. Start "Setup.exe". The installation wizard will guide you through the installation procedure.
- 5. After the installation is completed the following icon will appear on your desktop:

6. Double-click (left mouse button) this desktop icon to launch the software, the main interface will open up and another program icon will appear in your task bar.

7. The backup software

7.1 Start

1. Click the icon in your task bar with the right mouse button once. The following context menu will open up:

Show PC Clone EX

About PC Clone EX Help

Exit PC Clone EX

2. "About..." displays information about the software (fig. 6).

fig. 6

3. "Help" starts the help program of the backup software (fig. 7) where all functions of the backup software will be explained in detail.

fig. 7

- 4. "Exit PC Clone EX" quits the program (the icon will be removed from your task bar).
- "Show PC Clone EX" re-opens the program interface after you have minimized it (see below).
 Alternatively you may re-open the program interface by doubleclicking (left mouse button) the icon.

7.2Quick Launch

- A Quick Launch (7.2)
- B File Backup (7.3)
- C File Manager (7.4)
- D Setup (7.5)
- E Shows you information about the software (see above 7.1).
- F Starts the help program of the backup software (see above 7.1)
- G Minimize the program window. To completely quit the program see above 7.1.
- H Start the data backup by clicking this button.

7.3 File Backup

- A All folders of your system are displayed here.
 Choose the folders that shall be copied during a backup, by ticking the respective checkbox(es).
- B Select the external target device from the dropdown menu.
- C Start the backup by clicking the button.
- D Restore already existing backup files from the external (backup) drive, by clicking this button.

Note:

The backup files are copied to the (hidden) folder "Fnet" on the target device. This folder must not be deleted!

7.4 File manager

00	G*	Ø	中心		腸⑦
Implore Implore <td< td=""><td></td><td>Image My Computer III</td><td></td></td<>				Image My Computer III	

The File Manager makes it easy to govern your local folders/files and supports similar functions as known from the Windows Explorer.

7.5 Setup

7.5.1 Files Backup

- A Select between the windows "Files Backup" (7.5.1) and "Others" (7.5.2).
- B Decide what shall happen after the backup has been completed: "Show complete message" will show a summary of the backup; "Return program" returns to the program; "Power off" will shut down your system.
- C Choose whether all or only changed files shall be secured.
- D Determine a hot key to start the backup.
- E Select which system folders shall be included into the backup.
- F Determine whether the Files Backup folder shall be hidden and if the quick file backup shall be double confirmed or not.

7.5.20thers

- A Decide if the program shall be started during system boot-up.
- Activating this check box will also activate the backup button on the enclosure enabling you to commence a backup process by simply pressing the respective button (see above 4.). Deactivating will prevent unintentional backup procedures.
