

The Coba CES-350B 80+

The **Coba CES-350B 80+** is specifically designed for the demands of assemblers. As a mere bulk product it saves the cost for the retail packages which naturally has a positive effect on the final price.

For the same reason Inter-Tech choose a plain design to place the main priorities on the technical aspects. Whether it is the super silent 120mm fan, the big numbers of connectors (P4+4, PCI-Express etc.) or the two separated 12V-lines, **Coba CES-350B 80+** will satisfied all demands.

To prove its high quality standards the power supply has fulfilled all requirements for the 80PLUS® certification. That means that a high efficiency of the power supply is guaranteed and this is not only good for the environment but also helps to safe your money.
