IMPORTANT! This product adds an additional 6 lbs (2.7 kg) to your mounting solution. Your mounting solution's monitor weight capacity must be reduced by 6 lbs (2.7 kg) when using standard monitors less than or equal to 2.5" (64 mm) thick. Additional reduction will be required if monitors are greater than 2.5" (64 mm) thick.

**Important! Adjust your mounting solution to handle the added weight.**

You will need to adjust your product after installation is complete. **Make sure all your equipment is properly installed on the product before attempting adjustments.** Your mounting solution should move smoothly and easily through the full range of motion and stay where you set it. If movements are too easy or difficult or if product does not stay in desired positions, follow the adjustment instructions that came with your mounting solution to create smooth and easy movements. Depending on your product and the adjustment, it may take many turns to notice a difference. Any time equipment is added or removed from your mounting solution, resulting in a change in the weight of the mounted load, you should repeat the adjustment steps to ensure safe and optimum operation.
