# 1 INTRODUCTION

Thank you for purchasing the MANHATTAN® 2D Barcode Scanner, Model 177603. This scanner delivers high-quality scanning for a wide range of data collection functions to improve routine transactions, automate paper-based processes and increase productivity. The laser scan engine offers speed, accuracy and greater tolerances for reliable service reading popular 1D and 2D barcodes including UPC/EAN, UCC/EAN128, Data Matrix, PDF 417, Maxicode and more. Easy to implement and simple to use, a built-in keyboard wedge decoder sends scanned data to an active application where it appears as if it were manually typed or directly keyed into the computer. Its versatile USB interface and bus power integrate with most PCs without the need of an external power supply or complicated installation. With a scan rate of 200 scans per second and an accurate read range of up to 430 mm (17 in.), the MANHATTAN 2D Barcode Scanner offers a practical daily scanning solution for point-of-sale, postal, hospitality, travel, shipping, warehousing, office and other commercial and industrial applications to minimize manual data entry, speed transactions and reduce errors.

## 1.1 SAFETY CONSIDERATIONS

- Before cleaning the scanner, disconnect it from the power source. Use only a damp cotton cloth for cleaning. Avoid liquid cleaners, as the scanner must be kept dry to prevent short circuits.
- Do not drop the scanner.
- Do not yank the power cord.
- If the scanner is not in use for an extended time period, disconnect it from the power source to prevent damage from power surges.
- Do not attempt to disassemble the scanner. If it isn't working properly — possibly due to a damaged cord/plug, liquid seeping inside, an overly humid environment or physical damage of any sort — present the scanner to a qualified technician for repair.

## 1.2 HARDWARE FEATURES

## 2 INSTALLATION

1. If the included communication cable isn't already attached to the scanner, connect it to the bottom of the handle so you hear it click in place.
2. Turn off the host system.
3. Connect the scanner's communication cable to the host system.
4. If using an optional power supply, use it now to connect the scanner to an AC outlet.
5. Turn on the host system.

### Switching the Communication Cable

Before removing a connected cable from the scanner, it's recommended that the host system power be turned off and any power supply be disconnected from the scanner.

1. Insert a common pin or similar object into the pin hole just above the cable connection (as highlighted at right).
2. Push the pin into the hole until you hear a click, then gently remove the cable from the scanner handle.
3. Insert the replacement cable so you hear it click into place.

## 3 CONFIGURATION

You can set up your device by scanning all necessary programming codes for parameters that meet your current application requirements. After these scans, the device will save settings directly. To go back to the factory default settings, just scan the programming code Factory Default.

### 3.1 CHANGING SETTINGS WITH PROGRAMMING CODES

1. Turn on the scanner.
2. Change the scanner settings by scanning any of the programming codes that meet the requirements of the current application. After reading a valid programming code, the scanner will sound a high-pitched beep and the green LED will light.

**NOTE:** At any time, you can stop your programming and scan the Factory Default programming code to go back to the default setting(s).

### 3.2 FACTORY DEFAULT SETTINGS

Throughout this user manual, the factory default settings are printed in bold and are set inside brackets. See Section 7.3 for a list of readable and default enable symbologies.

# 4 OPERATING SETTINGS

## 4.1 SCANNING TRIGGERING

<Level>

A reading session begins (lighting and decode processing on) when the beam is activated and stops when the beam is deactivated.

Continuous Scanning

When the scanner is turned on, a continuous reading session begins (lighting and decode processing on).

Pulse

A reading session begins when the beam is activated and stays on until a period of inactivity equal to the time specified by the timeout. After the timeout, the scan engine turns off.

Continuous + Flashing

When the scan engine is turned on, a reading session begins (no need to activate the beam). After a period of inactivity equal to the time specified by the timeout, the scan engine starts flashing, checking for a barcode to be read. When a barcode is detected, the light automatically turns on and stays on until another period of inactivity (timeout). After the timeout, the scan engine starts flashing again.

### Level + Flashing

This mode allows you the switch between Level and Flashing modes. When the scanner is turned on, it is in Flashing mode (see Flashing below). You can automatically switch to Level mode by activating the beam line. After a period of inactivity equal to the time specified by the timeout, the scan engine switches back to Flashing mode.

### Flashing

Flashing mode activates the lighting and decoding function (no need to activate the trigger line). After a period of inactivity equal to the time specified by the trigger timeout, the scanner starts flashing, checking for a barcode to be read. When a barcode is detected, the lighting and decoding automatically turn on and stay on until another period of inactivity (timeout), after which the scanner starts flashing again.

### Autostand

This mode allows you to switch from Flashing trigger mode to Level trigger mode. Autostand begins in Flashing mode: At power-up, the lighting and decoding are on (no need to activate the trigger line) and after a period of inactivity equal to the time specified by the trigger timeout, the scanner starts flashing. To switch to Level trigger mode, activate the trigger line (press the trigger). When in Level trigger mode, after a period of inactivity equal to the time specified by the trigger timeout, the scanner switches back to Flashing mode.

### Toggle

This mode allows lighting and decoding toggle when the trigger line is activated. First trigger activation = lighting and decoding on; second trigger activation = lighting and decoding off.

### Presentation

This mode activates the lighting and decoding function. After a period of inactivity equal to the time specified by the trigger timeout, the lighting turns off or is dimmed. When a new barcode is presented, the lighting and decoding restart and stay on until another period inactivity.

## 4.2 TIME OUT

<2 sec>

4 sec

6 sec

### 4.3 GOOD READ MODE

When active, the scan engine stops the reading session after a successful decoding. **NOTE:** This parameter is *not* used with Continuous and Continuous + Flashing modes.

# 5 IMAGER SETTINGS

## 5.1 IMAGER MODE

The best reading performance of the scanner depends on the environment, the application of the scanner and the type of barcodes.

- Linear mode is for decoding 1D barcodes.
- Area mode is for decoding 1D and 2D barcodes.

Area mode allows you to set the position of the scanner in any direction — regardless of the orientation of the barcode — and perform a good read on 1D and 2D barcodes.

Linear mode allows you to increase your decoding speed while scanning 1D barcodes; however, you need to position the beam across all bars in the 1D barcode.

### <Area Imager>

### 6.3 USB PARAMETER

USB Mode

**NOTE:** The Set Factory Default setting (Section 6.1.1) would return to the original default setting instead of the customized setting. That is, if you are using the USB interface, your device will lose USB interface settings when the Set Factory Default code is entered. You would then need to re-scan the USB Mode barcode.

#### 6.4.2 DISABLE ALL SYMBOLOGIES

To disable all the symbologies, scan the code below. Otherwise, you can scan the Off code to disable individual symbologies.

Disable All Symbologies

**NOTE:** Do not reset individual parameter settings for each symbology. When you enable a symbology, you will recover the parameter settings stored in

memory. At any time, you can reset to factory defaults by scanning the Set Factory Default code (see Section 6.1.1).

## 6.37 PREAMBLES AND POSTAMBLES

### 6.37.1 PREAMBLE

The scanner can be programmed to output barcode data based on the format [PREAMBLE STRING] [BAR CODE DATA]. To send <STX> in front of the barcode, for example, scan only programming code <STX> and the resulting barcode output will be [<STX>] [BAR CODE DATA].

<Preamble None>

<STX>

### 6.37.2 POSTAMBLE

The scanner can be programmed to output barcode data based on the format [BAR CODE DATA] [POSTAMBLE STRING]. To send <ETX> after the barcode, for example, scan only programming code <ETX> and the resulting barcode output will be [BAR CODE DATA] [<ETX>].

Postamble None

## 7.4 SPECIFICATIONS

### Standards and Certifications

- FCC
- CE
- UL
- USB

### General

- Supports 1D and 2D barcodes
- Light source: red laser 650 nm
- Scanner range: 430 mm
- Resolution: 752 horizontal x 480 vertical pixels, 256 gray levels
- Reading indicator: tone and LED
- Ambient light: 100,000 lux maximum (sunlight)
- Scan rate: 200 scans/second auto-adaptive in linear mode; 56 images/second auto-adaptive in area mode
- Interface: USB
- Switch: trigger

### Code Support

- 1D: UPC/EAN, UCC/EAN128, ISBN, ISBT, Code 11, Code 39, Code 93/93i, Code 128, Interleaved, Matrix, Industrial, Standard 2 of 5, Codabar, MSI, Plessey, Telepen, Postal codes, GS1 DataBar
- 2D: Data Matrix, PDF 417, Micro PDF 417, Maxicode, QR code, Aztec, EAN.UCC composite

### Physical

- Dimensions: 19.3 x 9 x 7.2 cm (7.5 x 3.5 x 2.8 in.)
- Weight: 135 g (4.76 oz.)
- Cable length: 1.5 m (5 ft.)
- Operating temperature: 0 – 50°C
- Storage temperature: -20 – 70°C
- Relative humidity: 20 – 95% (non-condensing)
- Housing: ABS

### Electrical

- Voltage: DC +5 V +/- 5%
- Power consumption: 435 mA (in operation)

# REGULATORY STATEMENTS

## Federal Communications Commission Class B

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of Federal Communications Commission (FCC) Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from the receiver.
- Consult the dealer or an experienced radio/TV technician for help.

## CE / R&TTE

### ENGLISH

This device complies with the requirements of the R&TTE Directive 1999/5/EC.

### DEUTSCH

Dieses Gerät entspricht der Direktive R&TTE Direktive 1999/5/EC.

### ESPAÑOL

Este dispositivo cumple con los requerimientos de la Directiva R&TTE 1999/5/EC.

### FRANÇAIS

Cet appareil satisfait aux exigences de la directive R&TTE 1999/5/CE.

### POLSKI

Urządzenie spełnia wymagania dyrektywy R&TTE 1999/5/EC.

### ITALIANO

Questo dispositivo è conforme alla Direttiva 1999/5/EC R&TTE.

# WASTE ELECTRICAL & ELECTRONIC EQUIPMENT

## Disposal of Electric and Electronic Equipment

(applicable in the European Union and other European countries with separate collection systems)

### ENGLISH

This symbol on the product or its packaging indicates that this product shall not be treated as household waste. Instead, it should be taken to an applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences to the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. If your equipment contains easily removable batteries or accumulators, dispose of these separately according to your local requirements. The recycling of materials will help to conserve natural resources. For more detailed information about recycling of this product, contact your local city office, your household waste disposal service or the shop where you purchased this product. *In countries outside of the EU:* If you wish to discard this product, contact your local authorities and ask for the correct manner of disposal.

### DEUTSCH

Dieses auf dem Produkt oder der Verpackung angebrachte Symbol zeigt an, dass dieses Produkt nicht mit dem Hausmüll entsorgt werden darf. In Übereinstimmung mit der Richtlinie 2002/96/EG des Europäischen Parlaments und des Rates über Elektro- und Elektronik-Altgeräte (WEEE) darf dieses Elektrogerät nicht im normalen Hausmüll oder dem Gelben Sack entsorgt werden. Wenn Sie dieses Produkt entsorgen möchten, bringen Sie es bitte zur Verkaufsstelle zurück oder zum Recycling-Sammelpunkt Ihrer Gemeinde.

### ESPAÑOL

Este símbolo en el producto o su embalaje indica que el producto no debe tratarse como residuo doméstico. De conformidad con la Directiva 2002/96/CE de la UE sobre residuos de aparatos eléctricos y electrónicos (RAEE), este producto eléctrico no puede desecharse con el resto de residuos no clasificados. Deshágase de este producto devolviéndolo al punta de venta o a un punta de recogida municipal para su reciclaje.

### FRANÇAIS

Ce symbole sur le produit ou son emballage signifie que ce produit ne doit pas être traité comme un déchet ménager. Conformément à la Directive 2002/96/EC sur les déchets d'équipements électriques et électroniques (DEEE), ce produit électrique ne doit en aucun cas être mis au rebut sous forme de déchet municipal non trié. Veuillez vous débarrasser de ce produit en le renvoyant à son point de vente ou au point de ramassage local dans votre municipalité, à des fins de recyclage.

### ITALIANO

Questo simbolo sui prodotto o sulla relativa confezione indica che il prodotto non va trattato come un rifiuto domestico. In ottemperanza alla Direttiva UE 2002/96/EC sui rifiuti di apparecchiature elettriche ed elettroniche (RAEE), questa prodotto elettrico non deve essere smaltito come rifiuto municipale misto. Si prega di smaltire il prodotto riportandolo al punto vendita o al punto di raccolta municipale locale per un opportuno riciclaggio.

### POLSKI

Jeśli na produkcie lub jego opakowaniu umieszczono ten symbol, wówczas w czasie użycia nie wolno wyrzucać tego produktu wraz z odpadami komunalnymi. Zgodnie z Dyrektywą Nr 2002/96/WE w sprawie zużytego sprzętu elektrycznego i elektronicznego (WEEE), niniejszego produktu elektrycznego nie wolno usuwać jako nie posortowanego odpadu komunalnego. Prosimy o usunięcie niniejszego produktu poprzez jego zwrot do punktu zakupu lub oddanie do miejscowego komunalnego punktu zbiórki odpadów przeznaczonych do recyklingu.

**EN MÉXICO:** Poliza de Garantía MANHATTAN — Datos del importador y responsable ante el consumidor IC Intracom México, S.A. de C.V. • Av. Interceptor Poniente # 73, Col. Parque Industrial La Joya, Cuautitlan Izcalli, Estado de México, C.P. 54730, México. • Tel. (55)1500-4500

La presente garantía cubre los siguientes productos contra cualquier defecto de fabricación en sus materiales y mano de obra.

- A. Garantizamos los productos de limpieza, aire comprimido y consumibles, por 60 días a partir de la fecha de entrega, o por el tiempo en que se agote totalmente su contenido por su propia función de uso, lo que suceda primero.
- B. Garantizamos los productos con partes móviles por 3 años.
- C. Garantizamos los demás productos por 5 años (productos sin partes móviles), bajo las siguientes condiciones:
  - 1. Todos los productos a que se refiere esta garantía, ampara su cambio físico, sin ningún cargo para el consumidor.
  - 2. El comercializador no tiene talleres de servicio, debido a que los productos que se garantizan no cuentan con reparaciones, ni refacciones, ya que su garantía es de cambio físico.
  - 3. La garantía cubre exclusivamente aquellas partes, equipos o sub-ensambles que hayan sido instaladas de fábrica y no incluye en ningún caso el equipo adicional o cualesquiera que hayan sido adicionados al mismo por el usuario o distribuidor.

Para hacer efectiva esta garantía bastara con presentar el producto al distribuidor en el domicilio donde fue adquirido o en el domicilio de IC Intracom México, S.A. de C.V., junto con los accesorios contenidos en su empaque, acompañado de su póliza debidamente llenada y sellada por la casa vendedora (indispensable el sello y fecha de compra) donde lo adquirió, o bien, la factura o ticket de compra original donde se mencione claramente el modelo, numero de serie (cuando aplique) y fecha de adquisición. Esta garantía no es valida en los siguientes casos: Si el producto se hubiese utilizado en condiciones distintas a las normales; si el producto no ha sido operado conforme a los instructivos de uso; ó si el producto ha sido alterado o tratado de ser reparado por el consumidor ó terceras personas.
