			Internal 3.5" x 2 (compatible with one 2.5" HDD each), 2.5" x 1				

# Introduction

Continuing where the popular Milo ML03 left off, the Milo ML04 HTPC case again combines the full size features of Grandia series with slim form factor dimensions. The ML04 has a profile of 105mm height and 350mm depth, making it extremely easy to integrate into any living room furniture. Incredibly, this case can accommodate up to three 3.5" hard drives or five 2.5" HDD/SSD through its smartly designed drive cages that can mount either size without any use of adapters. The distinguishing feature of the ML04 is its lockable aluminum front door that is similar in design as the larger GD07 case with a LED dimmer that adds not only security but also improve integration in home theater environments. For those looking to build an HTPC with good expansion and cooling capability but has limited room and budget, the SilverStone Milo ML04 is an excellent alternative to the ML03.
