PROVEN PERFORMANCE, EXCEPTIONAL VALUE

A Mini PC with the capabilities of a desktop, the Intel® NUC Kit NUC5CPYH gives you performance you can count on with Intel quality you can trust all in 4 inches square. Complete with WiFi 802.11ac, Bluetooth* 4.0, and 4 USB 3.0 ports, the NUC5CPYH is perfect as a PC replacement or second home computer. The system has room for a 2.5" HDD so you can store all your files or SSD drive so you can transfer data at lightning speeds. In addition, there is an SD card slot so you can easily access files from other devices on your Intel NUC.

A replaceable lid gives you plenty of options to create the Intel NUC you want—with amazing style and features. There's also a high-speed USB 3.0 charging port that lets you easily charge your tablet or smartphone quickly even when the Intel NUC is idle. With this kind of power, size, and versatility, you'll rethink what's possible.

Power that's a fit for small business

The NUC5CPYH is equipped with the Intel® Celeron® processor, giving you the performance you need for simple productivity and collaboration. You can create presentations, access cloud-based applications, collaborate with colleagues, and work on multiple documents at once—just like you'd expect. It also features Intel® HD Graphics for stunning visuals without the cost of an additional graphics card.

With two video output options, there's no need to buy a new display to support your Intel NUC. Connect your displays via the HDMI* port or use the VGA port. Included Intel® WiDi¹ lets you also connect wirelessly to WiDi-enabled displays or projectors.

Use the VESA mount to create your own All-in-One or simply place the Intel NUC on your desk—it's only 4 inches square, so even the most cluttered desk has room. Hidden out of sight, mounted behind a screen, or parked on a desk, the Intel NUC works in multiple environments. And the Kensington lock with base security assures your Intel NUC is protected inside and out.

Intel technology and quality

With the Intel Celeron processor and Intel® Rapid Start Technology,¹ you get value performance along with less waiting and more doing. Intel® Ready Mode Technology¹ means you'll never miss out on IMs, real-time news and sports updates, or social media posts. It also lets you stay connected with friends and family by keeping your video conferencing apps running in the background. Who knew that 4 inches square could offer so much?
