

**Privacy Protection**  
**Anti-Scratch/Anti-Static**  
**Anti-Ultraviolet – 99%**  
**Anti-Fingerprint**

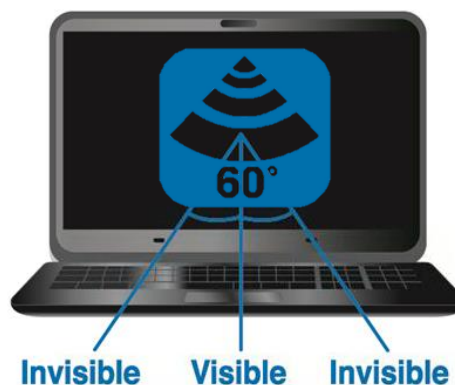

MicroSpareparts micro-louver technology creates a narrow viewing angle so that only the person directly in front of the monitor is able to see the on-screen data.

### **Product features:**

- Privacy protection using patented micro-louver technology
- Anti-scratch and anti-fingerprint coating to protect the filter
- Higher than 99% UV-block for eye protection
- Anti-glare screen helps reduce eye strain

### **Principal of product:**

Tiny vertical blinds on the surface of the filter creates a narrow viewing angle so on-screen data is visible only to the person directly in front of the monitor.

### **Cautions:**

- Turn off the monitor when installing filter
- The micro-louver layer on the surface of the filter is not a quality problem but an essential specification for protection function
- Keep the filter out of high temperature zones
- This filter is suitable for flat screens like LCD, TFT and laptops in general, don't use this for CRT monitors
