MasterCase H500P

MCM-H500P-MGNN-S00

Mind-Blowing Design

Features

High AirFlow with RGB Lighting* – Equipped with two 200mm RGB fans in the front, the MasterCase H500P guarantees high volume intake of fresh air. Use the RGB lighting to create a captivating build in your preferred color theme.

Covers for Clean Building – A PSU shroud, CPU cut out, and additional cable covers take clean cable management to the next level. Assemble clean builds like a pro!

Show Off Your Graphics Card** – Two additional PCI slots at the rear enable you to show off one graphics card in the vertical position.

Clear View Inside – The MasterCase H500P has a light grey tinted tempered glass side panel and plastic top/front covers, making it ideal for showcasing your build with (RGB) lighting.

Liquid Cooling Ready – The MasterCase H500P accommodates up to 360mm radiators on the top and front.

1 to 3 Splitter Cable for RGB LED Fans – The RGB Connector Splitter and 4 pin male to male adapters are included.

The MasterCase H500P will blow you away with its looks and performance!

Two impressive 200mm RGB fans in the front and two optional 200mm fans on the top will provide all the airflow you need. Armed with a tinted tempered glass side panel and transparent top and front panels, your RGB fans will shine bright and true.

The rugged, futuristic look and the structured bar design are inspired by the former High AirFlow series. With options such as built-in vertical graphics card mounting, a customizable PSU shroud, and various cable covers you can really personalize your build, all the while keeping it clean and neat.

Radiators up to 360mm are fully supported both in the top and front, so build a system that looks clean and cool, with performance that is even cooler.
