- ▀ Unique square-shaped RGB frame at the front and diamond bright at the back
- ▀ Support addressable RGB motherboard sync
- ▀ Enlarged blade surface increases more airflow by 40%
- ▀ Optimized low 300RPM

SquA RGB, an addressable RGB fan series, is designed with square-shaped lighting and PWM control. Featuring ENERMAX LED LIGHTING Technology, SquA RGB can deliver incredibly bright and even lighting. Engineered for high performance and better user experience, SquA RGB is characterized by 300RPM starting speed and up to 40% stronger airflow than other RGB fans. Furthermore, the vortex frame design generates concentrated airflow and ENERMAX's Air Inlet Design facilitates airflow effectively. SquA RGB is capable to provide superior airflow and stunning lighting effect.

Features

▀ Unique Square-shaped Lighting

SquA RGB features square-shaped lighting and also supports addressable RGB lighting sync with 16.8 million color options.

▀ Case Moddings and Builds with Square-shaped Lighting Fan

SquA RGB provides users with 2 types of lighting patterns to make the perfect match with system configuration.

▶ **Diamond Bright Behind SquA RGB**

A gleam through the holes around the back of the frame delivers the incredible visual experience as diamonds shining in the dark.

▶ **Addressable RGB Lighting Synchronization**

Synchronizable RGB lighting via addressable RGB header of motherboards.
(The RGB header 4-pin assignment is +5V/D/-/G)

▶ **Up to 40% Stronger Airflow**

The enlarged blade surface can create up to 40% stronger airflow than other RGB fans.

SquA RGB

Other

ENERMAX's Air Inlet Design
ENERMAX's Air Inlet Design brings more air in and also facilitates the airflow efficiency.

Vortex Frame Design

Vortex frame design can generate concentrated airflow, especially perfect for CPU cooler.

Optimized low 300RPM starting speed
The smart PWM speed control provides 300RPM starting speed for superior silent experience.

▀ Vibration-damping Rubber Pads

Vibration-damping rubber pads absorb the excessive vibration and noise.

3-Fan Pack Only

▀ 2 Ways to Control RGB Lighting Effects

Through Motherboard Software

Users can sync the RGB lighting with motherboards featuring addressable RGB headers (pin assignment: 5V/D/-/G).

Through ENERMAX RGB Control Box

Users can use the included control box to adjust preferred lighting effects (10 pre-set effects), brightness and speed.

Single Pack Only

▀ Plug & Play to Display Rainbow RGB Lighting Effects

For non-RGB motherboard users

Users can use the PWM power cable to connect the fan to create constant rainbow RGB lighting effects.

For addressable RGB motherboard users

Users can sync the RGB lighting with motherboards featuring addressable RGB header (4-pin assignment: 5V/D/-/G).
