Our USB-C to DisplayPort Converter with Power Delivery (PD) Port: 4K DisplayPort signal from your device's USB-C port and power for all devices

The Manhattan USB-C to DisplayPort Converter with PD Port makes it easy to show content from your USB-C device on an existing DisplayPort display, monitor or projector. This converter is easy and quick to install — no settings or adjustments required. It is a compact yet powerful solution that helps avoid extra cables, tangles and clutter to keep workspaces neat and tidy.

USB-C Power Delivery

The included USB-C PD port gives up to 60 W (20 V / 3 A) to all devices in your setup. Connecting the upstream device's cable and power adapter supplies power to the upstream device and boosts the 4K signal for a high-quality picture. The PD function also provides faster charging than standard chargers since it finds out the power needs of compatible devices and supplies it at the quickest and safest rate.
