

Rugged Thunderbolt USB-C

PORTABLE DRIVE
Data Sheet

Tough in the Field. Fast Everywhere.

- Thunderbolt™ speeds of up to 510MB/s¹
- Up to 5TB for large project storage
- USB-C for universal connectivity
- Bus powered for complete mobility
- Shock, dust, and water resistant for all-terrain use

design by neil poulton

Product Overview

Legendary Rugged® toughness meets USB-C compatibility, blazing-fast Thunderbolt speeds, and optional SSD performance for up to 510MB/s (up to 130MB/s with HDD). Also featuring a tethered cable and IP54-rated resistance to the elements, this Rugged drive means you don't have to compromise between durability, mobility, and speed.

Use Cases

- On-the-Go Content Creators: Universal compatibility, mobility, durability, and lightning-fast transfer speeds let these users move data quickly, wherever they go.
- Secure Mobile Storage: Protects against drops of up to two meters (6.6 feet), dust, water, being run over by a 1-ton car,² and even against unauthorized access with AES 256-bit software encryption.³
- Large File Sharing: Professionals, consumers, and students benefit from universal connectivity and USB 2.0 compatibility to share large amounts of data with any standard computer.

¹ These transfer rates were achieved using AJA System Test with the SSD version connected to a Mac computer via the Thunderbolt interface.

² Determined by a test that approximates a real-world scenario in which the hard drive remained functional, despite aesthetic damage, after the product was driven over by an approximately 1-ton car (1000 kg/2205 lbs).

³ Encryption software is only available via download and is not available in Russia.
