## Fast transfer and easy exchange

The use of two hard disks as a RAID array is popular and well spread thanks to many advantages. But whoever wants to take this advantage, often feels restricted as only few motherboards are equipped with a RAID controller and laptops can't fulfil this requirement at all. That is where the ICY BOX IB-RD3662-C31 comes to help and converts two 3.5" SATA hard disks effectively to a high-performance RAID array. The exchange of HDDs is easy due to EasySwap®.

## ICY BOX **IB-RD3662-C31**

Type-C™ RAID enclosure for 2x 3.5" SATA HDDs with USB 3.1

### Now available as a twin pack

This stylish 3.5" HDD enclosure can accommodate two HDDs with unlimited storage space. The HDDs can then be replaced without using any tool at any given moment even while operating thanks to the help of HotSwap and Plug & Play.

### Name is program

The whole enclosure except the front and rear of it is made of the versatile material aluminium, which we use for our coolers often as well. It transfers heat well and makes the enclosure also extremely light. Since raiding is very heavy on the HDDs a lot of heat is produced. the aluminium build of the enclosure is assisted by a cooling fan.

### Energy efficient

Thanks to the On/Off switch, the IB-RD3662 is a true energy saver. What is likewise well controlled, are rapid data transfer, either via Type-C™, USB 3.0 or THUNDERBOLT™ 3 connection. If desired, the hard disks are very easy to replace thanks to HotSwap and plug & play.
